Energy Management Policy Statement

The Executive team of Celotex recognise that the company’s activities must be adequately managed to provide specific solutions for the building and construction industry, which consistently meet the needs of our customers. This team will promote and support the necessary systems, procedures and Energy management initiatives to ensure energy use is clearly identified, managed and saved in line with both local, UK and international requirements whilst still meeting operational needs.

Through the application of documented management systems, certified to ISO 9001, 14001, 45001 and ISO 50001 the company will:

- Ensure that the Energy Management system operates in combination with our existing accredited management systems – Quality Management (9001:2015), Environmental Management (ISO 14000:2015) and Health and Safety Management (ISO 45001 – Currently working towards accreditation) systems.
- Meet the system demands of identifying energy usage through to reduction initiatives in line with business requirements.
- Meet the legal, local & international requirements in reducing Energy where possible.
- Drive towards completion of objectives and targets through WCM Energy led activity across the Eggborough and Hadleigh sites.
- Plan effectively with the aim of reducing electrical energy intensity & usage by the annual budgeted energy target.
- Maintain our present gas consumption levels or reduce our consumption where possible.
- Effectively contribute to the reduction of CO₂ emissions through reductions in Energy use and misuse.
- Ensure adequate information and resources are available to achieve the objectives and targets for the Eggborough & Hadleigh sites.
- Provide resources to effectively capture and review data to ensure prioritisation of objectives and initiatives to reduce energy where possible.
- Commit to supporting the purchase of energy efficient products and services.
- Ensure consideration be given to energy efficiency within the design and procurement for new projects, refurbishment works and plant upgrades.
- Communicate the importance of energy use to enable contribution from all employees at Eggborough & Hadleigh.
- Ensure the Energy policy, commitments and targets are reviewed on an annual basis.

Celotex is committed to a structured approach to the management of its activities, to ensure compliance with the requirements of BS EN 50001. The company will strive to continually improve the effectiveness of the Energy management system, via regular system audits, reviews and site-wide communications.

Continuous improvement will also be additionally shared and driven by the adoption of group wide Saint-Gobain improvement initiatives. This will require the training and involvement of all Celotex employees.

The Policy will be reviewed annually & at any other time it is considered necessary due to changes in business context, strategic direction or legislative requirements, it will be revised when necessary.
