

The Celotex Insulation Saw is a purpose designed hand-saw for the cutting of Celotex PIR insulation boards.

The Celotex Insulation Saw has the following benefits:

- Proven to reduce insulation dust by 50% and improve cutting time by 20%
- The only saw on the market specifically for cutting PIR insulation boards
- Fine, hard point teeth for smooth sawing
- Ideal for the cutting of Celotex XR4000 range, the thickest PIR insulation, available in thicknesses from 110-200mm
- Easy to use
- Celotex branded for clear identification

Celotex Insulation Saw

## Applications

Suitable for all roof, floor and wall applications where Celotex insulation board would need to be 'cut to fit'.

## Health & safety

Celotex products are not classified under CHIP3 regulations and are considered to be non hazardous. However, dust may cause respiratory irritation; inhalation and ingestion should be avoided.

When cutting Celotex product, use the Celotex Insulation Saw to minimise dust. When sawing in an enclosed space, dust extraction, eye protection and face masks must be provided.

If dust or particles have entered the eyes, irrigate thoroughly with emergency eyewash (or clean water). Seek medical advice should irritation persist.

## Physical properties

Saw length	350mm
Saw weight	225grams
Tooth protector clip	Included
Blade and handle	Celotex branded

## Further information
